Dear Sirs, I am writing to tell you that I dont feel that the NAB's should have any say to what I am aloud to listen to in my truck when I pay to have this service and choice to listen to it. I am a cross country truck driver with twenty years of driving a truck and never have I had a great tool in my truck like my XM radio when I get near a big city I can listen to the traffic report and make my choice of route before I get there and have to sit in all that traffic and have my truck just sitting in a city idled .I feel there are enough cars and trucks doing that as it is, plus with the price of fuel these days I really feel that my XM radio is helping me save money and fuel .
